PROFILE

Results-driven Frontend Developer with 3+ years of comprehensive experience in mobile application and web development ecosystems. Demonstrated expertise in architecting scalable, responsive applications using cutting-edge JavaScript frameworks and modern development methodologies. Specialized in delivering exceptional user experiences through advanced UI/UX implementation, seamless animations, and performance-optimized solutions that drive user engagement and business growth.

EXPERIENCE

Frontend Developer (web app)
2023-2024
Developed in Next.js a full-featured e-commerce platform with an admin panel for managing products, banners, and orders via CRUD operations. Designed animated product cards with hover effects, quick-view modals, and wishlist functionality. Integrated Stripe for secure payments, including card processing and order confirmations. Implemented a seamless add-to-cart system with real-time updates and persistent storage. Added a dynamic carousel for featured products with swipeable mobile support. Built dynamic pages for product details, category filtering, and search results with smooth transitions

Frontend Developer (mobile app)
2024-2025
Developed a Social-like mobile app using React Native featuring secure user authentication (SignIn/SignUp via Firebase), real-time text chatting with read receipts, and audio/video calling functionality (using Zegocloud/Agora). Implemented status updates a settings panel for profile customization (CRUD operations), and an animated onboarding screen for new users. Designed an interactive UI with smooth animations and gesture-based navigation, along with dark/light mode support for enhanced UX.
